dBzSHIELD

Shielded Flexible Conduit for EMI/RFI

dBzSHIELD® Shielding Effectiveness

>**Innovation:** Form/Fit/Function of our COTS Zero Ground shielded flexible conduit emulates many MIL SPEC conduit features for applications where MIL SPEC is not required.

>**Cost Effectiveness:** Our customers report installation time savings of 50% or more compared to hard pipe and some MIL SPEC conduit systems.

>**Value Add:** In addition to helping you select the correct Zero Ground shielded flexible conduit for the application, we can assist you in specifying shielded flexible conduit assembly solutions. (Conduit, fittings, adaptors, enclosures; kitting available)

>**Responsiveness:** Many products are inventoried or have lead times of 4 weeks or less, with flexible order minimums and packaging options.

dBz SHIELD

Zero Ground®

The dBzSHIELD® line of Shielded Flexible Conduits

Used to shield signal and power cabling runs where EMI/RFI is a concern. Liquidtight construction, used in fixed and mobile applications where COTS is acceptable. Optional Polyurethane jacket meets Low Smoke Zero Halogen requirements.

SBS® - Great Shielding - Flexible Steel Core with Tinned-Copper Braid and extruded jacket (PVC or Polyurethane)

Shielding effectiveness up to 66dB @ 1GHz

IBC® - Better Shielding - Flexible Bronze Core and extruded jacket (PVC or Polyurethane)

Shielding effectiveness up to 97dB @ 1GHz

BBS® - Best Shielding - Flexible Bronze Core with Tinned-Copper Braid and extruded jacket (PVC or Polyurethane)

Shielding effectiveness up to 118dB @ 1GHz
